About Planet Shani (Saturn)

Saturn, its Justice power and executing deed yield (karmfal) Nature, has the biggest fear among people when it comes to the nine planets but people who were once afraid are becoming more aware as they now know the basic knowledge about astronomical planets. Thus, the more they know about the true information of Saturn's $7\frac{1}{2}$ (7.5) period, the more they will come to know the truth. Knowing about Saturn and its $7\frac{1}{2}$ (7.5) period not only will be interesting but also will Excel these knowledge. Often Saturn's $7\frac{1}{2}$ (7.5) period is treated as a bad phenomenon whether it's a $7\frac{1}{2}$ (7.5) period of 'Gochar' or the $2\frac{1}{2}$ dhaiyya period but in reality it is not like that at all. Normally, people get afraid when hearing the word 'Sade Sati' (seven and half) this is because there are many misconceptions and hoaxes about Saturn.

Generally, Saturn is considered a planet which brings punishment is ruthless and an angry planet which leads to people running from Saturn $7\frac{1}{2}$ (7.5) period or $2\frac{1}{2}$ (2.5) period. Human life is filled with sorrow and happiness, that is why there is no need to fear the $7\frac{1}{2}$ (7.5) period. Saturn always gives us bad or good results according to our karma. Just like Lord Shiva who at one time is ferocious and is merciful the other time, Saturn is also merciful. In Modern Times, Saturn is considered so fearsome and dangerous that we people don't even hang his photo on our walls and no sculpture would make his effigy. On a macro level these perceptions are as same as all the snake species considered venomous. Whereas except some species, most snake species are not as venomous as they are named.

Likewise the 'mahadasha' or the 'sadesaati' awares us about the good and the bad results to be received in future and that can be ascertained by the position of Saturn in the birth horoscope. It is not necessary that it has to be a negative result, any condition of the planets gives two results always. First is Vimshottari, Mahadasha or Antardasha under which the person for his or her lifetime has to bear the mahadasha or antardasha of a Planet according to his or her previous karmas if there is a situation where the horoscope should the mahadasha of the good and useful planets then he or she will continue to receive good news in that duration second condition is of gotcha transit planets the planets also healed either good or bad results by gochari mean that the situation in which the current planet are in from the from the coaches we can determine our future Karma and the result according to them Sade Sati is an advanced method of studying horoscope and its prediction and that is why we are talking about actually talking about the transit state of planet Saturn.

About Shani Sadesati

Every planet rotates around the astronomical planets with a limited speed. There are a total of 12 zodiac sign in Zodiac and complete Zodiac is divided into 360 parts. Like this, every Zodiac Sign has 30 parts. The timeline in which these 30 parts are beard is called bearing the zodiac. But not all planet have the same speed. Some planets are fast some are not. For example, moon takes only 56 hours to bear one zodiac sign where as Saturn is famous for its slow speed takes a long period of 30 months to complete a circle of 1 zodiac sign. Likewise, other planets takes either less or more time to complete zodiac sign.

Moon is a factor Planet of the mind and is considered important like the ascendant. In the nine planets moon is hailed as the most important however according to science it's a secondary planet, so moon has become a practical planet when it was named the secondary ascendant in Indian Astrology. Hence, there is a rule according to the gochar method that while visiting the gochar methods it is known that at the 12th, 1st or 2nd place from the Moon there is a sinful planet, it is likely that the person's mind and brain will be affected by it. The schedule of that person is disorganised. Success at work will be achieved at a delay or with the same of obstacle. There is Resistance against your loved ones. Frequent health issues in childhood are present. Having bad or Sinister effects on either moon or mind leads the person not to take soulful decisions and because of that even a smallest of problem looks like a mountain.

Saturn is the predominant planet of Sin, so, when this planets enters from the phase of moon zodiac (The zodiac sign where moon is located to) to the 12th position, moon's own 1st Zodiac or from Moon to 2nd Zodiac then this saturn affects both the moon and the mind of that person. When this kind of situation arises in the gochar, it is known as Saturn seven and half Sadesaati this is called Sadesati because Saturn Stays on a Zodiac for a duration of 30 months i.e 2.5 years. Like this, in 3 zodiac, it is 90 months i.e. 7 years, 6 months or 7 and a half years. Thus, in simple words the seven and half years are known as Sadesaati.

Immunity & Exceptions of Shani SadeSati

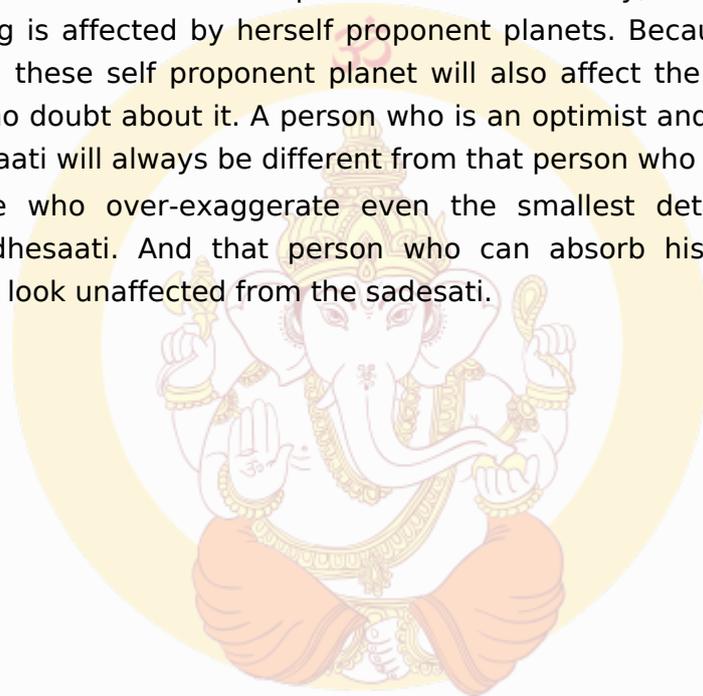

Why some people are Immune to Saturn's SadeSati or Dhaiya?

Some curious people who are interested in astrology always ask that Does Saturn Sadhesaati (seven and half) or Dhaiya (two and a half) affects everyone in the same manner? The answer is 'NO'; because every person's personalities are distinct, that is why every person will have different thinking and their way of doing things will be always different from others.

You must have seen that some people choke under the smallest of pressure and some keep themselves calm even in the difficulty of situations. This all depends on the perception of life viewed differently by different kinds of people. As a result, these factors plays out a lot in the saturn's SadheSati. On thinking capabilities are different because we are affected by our self-proponent planet and behave according to the behaviour of our self proponent planets.

Our whole life whether it is our position in the society, our behaviour, our financial prosperity, etc. Everything is affected by herself proponent planets. Because these planets plays an important role in our life, these self proponent planet will also affect the Sadhesaati and Dahiya of Saturn. There should be no doubt about it. A person who is an optimist and is loyal towards his or her work. The effect of SadeSaati will always be different from that person who is fatalyst and lazy.

Similarly, those who over-exaggerate even the smallest details will have a negative Outlook towards the sadhesaati. And that person who can absorb his/her problems as well as happiness, he/she will not look unaffected from the sadesati.

Effects & Results Shani SadeSati

Details

As explained before when Saturn passes through Moon Zodiac to 12th, 1st and 2nd Zodiac then it affects the person as Sadhesaati because Saturn stays for two and a half years in one Zodiac sign. So the whole period of Sade Sati becomes longer. But that doesn't mean that the person has to face problems for the full 7 years and 6 months. Some of the time of Sadhesaati will be cruel, some will be normal and some are times where the person gains extra prosperity apart from is already owned possessions.

From a basic point of view, this whole period has been divided into 4 parts and they are as follows :

1. **First 16 months** : Sudden obstacles, increase in Rivals, death of any elderly in your family (these are the possibilities but if there are already a *Maha Dasha* or *Antar Dasha* of a Benefic Planet then this phase becomes *Null* .

2. **Second 25 months** : Even with all the problems, there are some profitable situations someone comes to help also help comes from the down part of the society.

3. **Third 9 months** : Some health related problems may arise, feelings of detachment may also arise towards family. Possibility of Travel and Stay far from home during this Period increases a lot.

4. **Fourth 30 months** : You might get possessions that are permanent, help will come from friends and relatives.

In the statements mentioned above, the good and bad results of Sadhesaati has been explained on a gross level. There can be many changes depending on the favourable or unfavourable position of Saturn in the birth horoscope. The detailed assessment of the sadhesaati can only be done by deeply studying the birth horoscope or by Palm Lines. If there is no sign that sadhesaati will bring something bad. Then, it can be said that no big problem will come in future and there is any indication that sadhesaati will be bad then the birth horoscope and palm lines will show sign of it.

Other than Saturn's seven and a half being important in Gochar (transit), Jupiter and Rahu also affects the Gochar (transit) cycle. calculations of Vimshottari Mahadasha and Antardashas are also important. If there is a mahadasha of the proponent planet, then the bad effect of Sade Sati lessens or not, that depends. Other than this, if there is a powerful performance of saturn in the Gochar then also Sadhesaati will not harm much. You should consult an expert astrologer for calculating and assessment of sadhesaati.

Saturn`s two and a Half (Shani ki Dhaiya)

Saturn`s transition when enters the horoscope for two and a half years, it is known as Shani ki Dhaiya Dhaiya means 2 years and 6 months also known as two and a half years. Like Sadesaati dhaiya comes upon every Zodiac signs. When Shani Dev is on 4th or 8th position of any Zodiac, then Dhaiya prevails till the Shanidev moves forward from those positions.

Remedies

In Dhaiya, the moon who is the base planet of our Zodiac suffered due to Shani (Saturn). The black colour of saturn covers the white surface of moon. Then take it down from your body For 7 times, then pray to Saturn for Mercy and shed that cloth in which that coconut is wrapped into a place like like pond or where there is a lot of water. Do it on 3 shanichara Amavasya (New Moon for 3 times). Do it on every shnehari amavasya during the period of Dhaiya.
